DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-6 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious an appearance inspection apparatus having at least one telecentric lens and at least a corresponding number of one-dimensional line sensors in an arrangement parallel to the image capturing direction such that each telecentric lens forms an image of reflected light reflected from said board surface and each one-dimensional sensor captures catoptrical light and that each one-dimensional sensor captures an image segment of the board surface for forming a partially overlapping portion; and wherein said main unit further comprises: an image processing unit that assembles the images captured by each of said liner sensors after calibrating pixel data in said overlapping portion and attaches the images together; and an analysis unit that inspects an image segment with reference to a given evaluation standard to determine pass or failure for each inspection item, and in combination with the other recited limitations of claim 1. Claims 2-5 are allowed by the virtue of dependency on the allowed claim 1.

Regarding claim 6, the prior art fails to disclose or make obvious a method of inspecting appearance having the steps of capturing images of a board to be inspected utilizing multiple telecentric lenses in such a manner that the captured images partially overlap; putting together

said images after correcting for color convergence in said overlapped portion; and performing a given inspection based on said synthesized image, and in combination with the other recited limitations of claim 6.
